

# Microsoft Technical Training

## Microsoft Partner

Silver Learning

Το Hellenic American Κε.Δι.Βι.Μ.2, ως πιστοποιημένος εκπαιδευτικός συνεργάτης της Microsoft (Microsoft Silver Partner for Learning Solutions), προσφέρει επίσημη εκπαίδευση σε όλες τις τεχνολογίες Microsoft όπως Windows Server, Exchange Server, SharePoint, SQL Server. Τα σεμινάρια συνδυάζουν θεωρητική και πρακτική κατάρτιση από εξειδικευμένους επαγγελματίες.

Γιατί να επιλέγετε μόνο πιστοποιημένο εκπαιδευτικό κέντρο:

- ✓ Επίσημο διδακτικό υλικό (Microsoft Official Courseware) σε όλους τους σπουδαστές
- ✓ Πιστοποιητικό παρακολούθησης από την Microsoft
- ✓ Καθηγητές επαγγελματίες (MCPs) και πιστοποιημένοι Microsoft Certified Trainers (MCTs)
- ✓ Αξιολόγηση της εκπαίδευσης στο παγκόσμιο σύστημα MetricsThatMatter (MTM)

Αποκτώντας μια πιστοποίηση της Microsoft αποδεικνύετε τις δεξιότητες και τις γνώσεις σας στα προϊόντα και τις πλατφόρμες της Microsoft, την σχετική εργασιακή σας προϋπηρεσία και τις τεχνικές σας ικανότητες στην επίλυση προβλημάτων.

Προσφέρονται σεμινάρια προσαρμοσμένα στις ανάγκες των εταιρειών με επιλεγμένη θεματολογία από τα προγράμματα της Microsoft. Η εκπαίδευση μπορεί να διεξαχθεί είτε στις εγκαταστάσεις μας, είτε σε αυτές του πελάτη.

# Microsoft Technical Training

## Microsoft Certified: Azure Administrator Associate (32h + 8h extra exam prep)

Responsibilities for this role include implementing, managing, and monitoring identity, governance, storage, compute, and virtual networks in a cloud environment, plus provision, size, monitor, and adjust resources, when needed.

An Azure Administrator often serves as part of a larger team dedicated to implementing an organization's cloud infrastructure.

### Course: Microsoft Azure Administrator

This course teaches IT Professionals how to manage their Azure subscriptions, secure identities, administer the infrastructure, configure virtual networking, connect Azure and on-premises sites, manage network traffic, implement storage solutions, create and scale virtual machines, implement web apps and containers, back up and share data, and monitor your solution.

### Preparation for exam AZ-104

## Microsoft 365 Certified: Modern Desktop Administrator Associate (80h + 16h extra exam prep)

Modern Desktop Administrators deploy, configure, secure, manage, and monitor devices and client applications in an enterprise environment.

### Course: Windows 10

In this course, you will learn how to support and configure Windows 10 desktops in an organizational environment. You will develop skills that include learning how to install, customize, and update Windows 10 operating systems. You will learn how to managing storage, files, and devices as well as how to configure network connectivity for Windows 10. You will also learn how to secure the Windows 10 OS and protect the data on the device. Finally, you will learn how to manage and troubleshoot Windows 10.

### Preparation for exam MD-100

### Course: Managing Modern Desktops

In this course, you will learn how to plan and implement an operating system deployment strategy using modern deployment methods, as well as how to implement an update strategy. You will be introduced to key components of modern management and co-management strategies. This course also covers what it takes to incorporate Microsoft Intune into your organization. You will also learn about methods for deployment and management of apps and browser-based applications. You will be introduced to the key concepts of security in modern management including authentication, identities, access, and compliance policies. You will be introduced to technologies such Azure Active Directory, Azure Information Protection and Windows Defender Advanced Threat Protection, as well as how to leverage them to protect devices and data.

### Preparation for exam MD-101

μπορούν να προσφερθούν  
και online ή σε μεικτή μορφή  
online-δια ζώσης (Blended  
Distance Learning)

## Microsoft 365 Certified: Enterprise Administrator Expert (80h + 16h extra exam prep)

Microsoft 365 Enterprise Administrators evaluate, plan, migrate, deploy, and manage Microsoft 365 services.

### Course: Microsoft 365 Identity and Services

This course covers three central elements of Microsoft 365 enterprise administration – Microsoft 365 tenant and service management, Office 365 management, and Microsoft 365 identity management. In Microsoft 365 tenant and service management, you will examine all the key components that must be planned for when designing your Microsoft 365 tenant. Once this planning phase is complete, you will learn how to configure your Microsoft 365 tenant and finally, how to manage your tenant.

Office 365 management begins with an overview of Office 365 product functionality, including Exchange Online, SharePoint Online, Microsoft Teams, Microsoft Power Platform, additional product resources, and device management. You will then transition to configuring Office 365, with a primary focus on configuring Office client connectivity. Finally, you will examine how to manage Microsoft 365 Apps for enterprise deployments. You will wrap up this section by learning how to configure Office Telemetry and Microsoft Analytics. The course concludes with an in-depth examination of Microsoft 365 identity synchronization, with a focus on Azure Active Directory Connect. You will learn how to plan for and implement Azure AD Connect, how to manage synchronized identities, and how to implement password management in Microsoft 365 using multi-factor authentication and self-service password management. This section wraps up with a comprehensive look at implementing application and external access. You will learn how to add and manage applications in Azure Active Directory, and how to configure Azure AD Application Proxy. Finally, you will examine how to design and manage solutions for external access.

### Preparation for exam MS-100

### Course: Microsoft 365 Mobility and Security

This course covers three central elements of Microsoft 365 enterprise administration – Microsoft 365 security management, Microsoft 365 compliance management, and Microsoft 365 device management. In Microsoft 365 security management, you will examine all the common types of threat vectors and data breaches facing organizations today, and you will learn how Microsoft 365's security solutions address these security threats. You will be introduced to the Microsoft Secure Score, as well as to Azure Active Directory Identity Protection. You will then learn how to manage the Microsoft 365 security services, and you will be introduced to the various reports that monitor your security health. You will then transition from security services to threat intelligence (Security Dashboard and Advanced Threat Analytics). Microsoft 365 compliance management begins with an overview of all key aspects of data governance. You will then delve deeper into archiving and retention. Now that you understand the key aspects of data governance, you will examine how to implement them. You will then focus on managing data governance in Microsoft 365, learn how to implement Azure Information Protection and Windows Information Protection, and conclude this section by learning how to manage search and investigation.

The course concludes with an in-depth examination of Microsoft 365 device management. You will begin by planning for various aspects of device management, you will learn how to transition from Configuration Manager to Intune, and you will be introduced to the Microsoft Store for Business and Mobile Application Management. At this point, you will transition from planning to implementing device management; specifically, your Windows 10 deployment strategy.
